

AMCTO's Corporate Training

Risk Management Practices and Strategies

1 Day Workshop

A one-day practical and interactive workshop for Municipal managers, supervisors and elected officials who see the need for pro-active and proven strategies to improve systems.

- Why is risk-management **important** to municipal infrastructure, construction and maintenance, public services and administration?
- Why are risk management tools **needed** in strategic decision-making?
- What is the **difference** between physical, financial and reputation risk management?
- What are '**cost of risk**' components?
- How can I **protect** my organization, its employees and volunteers from lawsuits?
- **Is it working?** How do I evaluate techniques already implemented?
- Are there any **proven techniques** to analyze current and proposed projects and services?
