

AMCTO's Corporate Training

Municipal Project Management Fundamentals

1 Day Workshop

This is our new and unique course designed for the municipal world.

In this session, participants will learn how to plan and execute small and large work into measured and cost effective projects in municipalities.

Project Management Fundamentals will establish a foundation in project management methodology and share Lessons Learnt and Best Practices for effective project execution. The session will combine the theoretical knowledge of project management with hands on examples of municipal case studies. At the end of this course participants will gain practical know-how on how to successfully complete projects in order to meet their staff, management, stakeholders and clients needs and expectations.

What You Will Learn:

- Understanding of the five process groups and nine knowledge areas
- How to apply the process within a municipal environment
- Learn the tools and techniques that will allow the project team to focus on the delivery of the project's objectives and at the same time ensure that the stakeholder(s) are well informed of the project's progress
